PROJECT SHOWCASE

Password Manager | Azure Cloud Solution

(ASP.NET, Azure, DevOps)

The Password Manager is used to store secrets securely. The cloud architecture for this application is hosted on Azure. The password manager Frontend is developed using Blazor and hosted on Azure App Service. This application is Azure AD protected and ensures the secrets requested can only be accessed by authorized personnel.

Set-Variable | GitHub Action

(YAML Powershell)

This actions aims to provide library groups functionality of Azure DevOps to GitHub Actions with just a few lines of code

This is added to GitHub Marketplace (https://github.com/marketplace/actions/set-variable)

Oncue - Reminder App | Android App (XML, Java, SQL)

This app was developed as part of an app marathon competition. This app is a reminder app with a twist, it detects people around and allows you to set reminders based on vicinity of a person. (https://play.google.com/store/apps/details? id=com.codeadventure.oncue)
